

## **Structure Plane**

### **Information architecture**

The website will feature one page with a header and footer but the focus being on the google map and search functionality.

### **Interaction Design (IXD)**

- A search bar will prompt the user to interact and search for eating establishments.
- The location search will autofill to avoid searching the wrong location.
- The site will feature a central panoramic image as the main background sitting behind the google map. The colour themes will be green and orange to compliment the main background and map.
- The links to Facebook, Twitter, Instagram and Youtube will change colour to indicate the pathway to the user.
